

Critical Information Summary

Cadiz³ Business nbnTM

Service Description

Cadiz³'s Business nbnTM is a Broadband Internet service delivered using a combination of Cadiz³ and National Broadband Network (nbnTM) infrastructure (Technology types: FTTP, FTTB, FTTN, FTTC, or HFC) to the network boundary point of your premises.

Key information about this plan:

- Broadband service on the nbnTM at the nominated speed tier
- 1 Static IP Address (IPv4)
- Unmetered uploads and downloads

Availability

The service is available to business customers with a current Australian Business Number (ABN) and where nbnTM infrastructure is currently installed or is to be installed. Certain nbnTM service technology types (FTTN, FTTB and FTTC) may require an available copper lead-in to be connected at the premises and is not part of this service.

Speeds

Services delivered on the nbnTM network are provided as per the bands in the plans table below.

The actual speeds for the service may be slower and vary due to many factors including location and type of content being downloaded, hardware and software configuration, the source of the content or interconnecting infrastructure not operated by Cadiz³.

Devices connected by Wi-Fi may experience slower speeds than those connected by an Ethernet cable.

Battery Backup / Power Outages

These services do not include a battery backup. In the event of a power outage, your services may be temporarily unavailable.

New Development Fee

If you are in a new development area, nbnTM may charge \$299.00 including GST to connect your premises. If applicable, we will advise and include this charge on your first invoice.

Minimum Term

Business nbnTM services are available on 1-month minimum contract terms. See Minimum Total Cost applicable to each plan in the plans table.

Cancellation / Early Termination Charges

Terminating a Cadiz³ Business nbnTM within the first month will require that the remaining balance of any charges including new line/new development incurred to be paid to Cadiz³.

Manage Your Account and Services

You can manage your account, view usage data, upgrade/download your speed tier, pay your bill or log a support ticket using Cadiz³'s customer service portal <https://ember.cadiz3.com.au>.

Billing

Services are billed in advance and are non-refundable. Your first Invoice will include a pro-rata rental amount for the partial month of when the service activated until the end of that billing cycle, the following month's rental amount, and any applicable build or once off charges. You will receive your monthly Invoice on or around the 20th of each calendar month.

Failing to pay your Invoice by the due date may result in your service being restricted.

Acceptable Use

The service is subject to our Acceptable Use Policy at <https://www.cadiz3.com.au/policy>.

The service must not be used in a way that is unreasonable, in a fraudulent manner, or in a way that detrimentally interferes with the integrity of the network. If you breach the Acceptable Use Policy, we reserve the right to restrict, suspend or terminate your service without notice.

Hardware

If you choose to supply your own hardware you are responsible to configure and ensure it is compatible with the nbnTM technology used to deliver the service.

Hardware supplied as part of a managed service remains the property of Cadiz³.

During the term, hardware can be purchased at 'market rate', after which time management on the hardware will cease.

Critical Information Summary
